

Towbar wiring kit with electronic module

Application:

- Cargo trailers;
- 7-pin trailer socket.

Short description:

The module does not overload the lamps driving system of the car as the current consumption from signal inputs is approximately 2 mA, which excludes the malfunction of the car electronics system.

Thanks to integration the output wiring harness with the 7-pin trailer socket, installation of module is fast and easy.

The sequential control of fog light enables turning on the trailer fog light while the car fog light is turned off. Turning on only the trailer fog light is possible by turning on and off the fog light switch. This function eliminates reflection from trailer front surface which could dazzle the driver.

The module has optional multicolor LED signalling the connection of trailer, turn indicators bulb damage (also acoustic warning) and turning on the trailer fog light.

Additionally, the module can control the car park distance control system.

Assembly kit content:

1. Control unit;
2. Output harness with 7-pin trailer socket;
3. Input harness;
4. Powering harness;
5. Harness with multicolor LED (option);
6. Assembly accessories.

Main features:

-  7 dedicated to 7-PIN trailer plug
-  compatible with vehicle lamps which have LEDs or bulbs
-  S fog light sequential control
-  "Blink Control" function - BC detection of burned out direction light bulb
-  parking sensor control
-  multicolor LED indicator (option)

Complete checking of module correct connection is possible using the tester available in the manufacturer offer.
