

Towbar wiring kit with electronic module

Application:

- Cargo trailers;
- 7-pin trailer socket.

Short description:

The module does not overload the lamps driving system of the car as the current consumption from signal inputs is approximately 2 mA, which excludes the malfunction of the car electronics system.

Thanks to integration the output wiring harness with the 7-pin trailer socket, installation of module WH3L is fast and easy.

Assembly kit content:

1. Control unit;
2. Output harness with 7-pin trailer socket;
3. Input harness;
4. Powering harness;
5. Assembly accessories.

Main features:

-  7 dedicated to 7PIN socket
-  compatible with vehicle lamps which have LED diodes or bulbs
-  vehicle fog light is not turned off

Complete checking of module correct connection is possible using the tester available in the manufacturer offer.
