

Power supply and battery charging wire set for caravans

Application:

- caravans;
- 13-pin trailer electric installation;
- adapted to work with selected QUASAR modules

Main features:

13 13-pin trailer plug compatibility

12V → caravan power supply circuit

caravan battery charging circuit

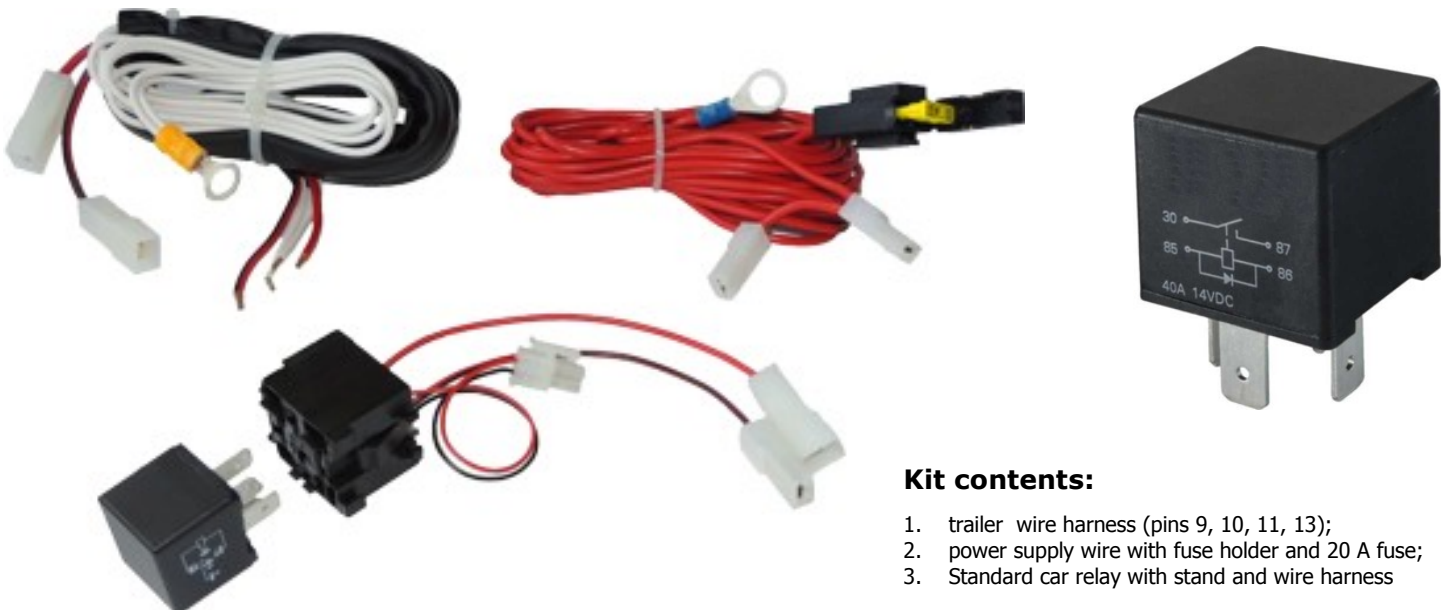

relay switching the charging voltage of the trailer battery

Short description:

The G13-RELAY-EXT-KIT is designed for providing the power supply and charging of the caravan battery through the 13-pin socket conforming to the ISO 11446 standard (power supply circuit: pin 9 - „+“, pin 13 - ground; trailer battery charging circuit: pin 10 - „+“, pin 11 - ground).

The kit is intended as an extension of the functionality of Quasar modules equipped with the function of switching the trailer battery charging relay.

The kit is equipped with an autonomous power cord protected by a 20 A fuse.

Kit contents:

1. trailer wire harness (pins 9, 10, 11, 13);
2. power supply wire with fuse holder and 20 A fuse;
3. Standard car relay with stand and wire harness
