

Towbar wiring kit with electronic module

Application:

- Cargo trailers;
- 7-pin trailer socket.

Main features:

dedicated to 7-PIN trailer plug

compatible with vehicle LED or bulb lamps

data reading from CAN-bus

fog light sequential control

"Blink Control" function - BC
detection of blown turn light bulb

parking sensor control

multicolor LED indicator

Assembly kit content:

1. Control unit;
2. Output harness with 7-pin trailer socket;
3. CAN-bus harness;
4. Powering harness;
5. Multicolor LED;
6. Assembly accessories.

Short description:

The module does not overload the lamps driving system of the car, because the information about the lights are read directly from the CAN-bus, which excludes the malfunction of the car electronics system.

Thanks to integration the output wiring harness with the 7-pin trailer socket and ability to connect directly to CAN-bus, installation of module is fast and easy.

The sequential control of fog light enables turning on the trailer fog light while the car fog light is turned off. Turning on only the trailer fog light is possible by turning on and off the fog light switch. This function eliminates reflection from trailer front surface which could dazzle the driver.

The module has multicolor LED signaling the connection of trailer, turn indicators bulb damage (also acoustic warning) and turning on the trailer fog light.

Additionally, the module can control the car park distance control system.

Complete checking of module correct connection is possible using the tester available in the manufacturer offer
