

Tow bar wiring kit with electronic module

Application:

- Vehicles with 12 V electrical installation;
- Cargo trailers equipped with electrical installation with 7-pin plug (ISO 1724).

Short description:

The module does not overload the lamps driving system of the car as the current consumption from signal inputs is approximately 1 mA, which excludes the malfunction of the car electronics systems.

The module is designed to interoperate with both traditional fiber bulbs and LED lamps for cars and trailers. The module uses a digital analysis of multiplexed control for all lights.

The module is economic solution for 7-pin trailer wiring systems.

Assembly kit content:

- Control unit;
- Wiring harness;
- 7-pin trailer socket with seal and screws;
- 10 A fuse with holder;
- Assembly accessories.

Main features:

-  **7** Interoperation with 7-pin trailer plug
-  Designed for mounting in vehicles with incandescent bulb or LED lamps and with a standard or multiplexed installation
-  Interoperation with trailer incandescent bulbs or LED lamps
-  Vehicle fog light is not turned off
-  Analog PWM signal analysis

Trailer tester available in company's offer gives possibility to simulate trailer wiring system and verify kit installation
