

Wire harness with electronic module for towbar

### Application:

- Cargo trailers;
- 7-pin trailer socket.

### Short description:

ITS-SMART-G7 is the first solution on the market that integrates socket with electronic control module.

ITS-SMART-G7 provides easy and quick installation.

Integrated module does not load car electric circuits. Due to the fact that the power consumption on each of the signal input is approximately 1 mA, there is excluded interfere with the electronic circuits of the vehicle. The module can be installed in the vehicles equipped with bulb or LED lamps.

ITS-SMART-G7 is the most economical solution designed for installation of 7-wire trailer sockets.

### Kit contents:

1. Integrated socket;
2. Main harness;
3. Powering wire;
4. Mounting kit.

### Main features:

Dedicated to 7-PIN socket

Compatible with vehicle which have LED or bulb lamps

Vehicle fog light is not turned off

### NOTICE!

The design of integrated electrical socket to connect the trailer is patent pending No. **P.408956**

Checking fully correct connection of the module is possible using the tester available in the manufacturer offer.
